Overall Theme: Making Learning Meaningful

What do we want from learning? What do we expect from it in the future? And how can technology help us achieve it? We need to think about our ultimate objective, both individually and collectively.

We talk about ‘transformative’ change but do we really understand what we mean? We say we want to put learning “at the heart of life”, we are passionate about educational opportunity, we care deeply about lifelong learning but do we even know what our real goal is? Where do we want to go and how do we get there? How do we give real significance to education and training? How do we make learning mean something? How does learning become meaningful?

Online Educa Berlin (OEB Global) 2020 will not only look at the process of learning, but also its purpose, asking what we want to make learning mean. Like a star above the horizon, it will help point the way to our destination.
