

Theme OEB 2017: Learning Uncertainty

We live in an age of acceleration. We are in the midst of a sea-change - a profound, transformative shift in knowledge, experience and perception. It is a new era defined by technology, globalisation, information and, above all, uncertainty.

Our uncertainty is born of the rapid and continuing change around us. Technology is already developing faster than we can learn the skills we need to use it. Information is the world's most valuable commodity. Demographic change, political turbulence, economic challenges and environmental threats confront us. There has always been uncertainty but this is different. We are facing the end of stability. Are we ready for this new era? Are businesses, governments and societies really prepared for our uncertain future?

OEB 2017 is about acknowledging uncertainty and preparing for it. It is about how transformative education, training and learning can equip businesses, organisations and individuals with the skills to survive and prosper in our new era.

Conference themes include:

- Adapting for Action
- Collaborating to Compete
- Redefining Learning Technology
- Designing to Engage
- Enhancing New Skills Learning
- Made to Measure Learning

»It's the best event of it's kind in the world«

Andrew Keen, Author and salonFutureCast, USA

»It's about giving people a compass and navigation tools to find their own way through an increasingly volatile, complex world and this conference is absolutely central to that«

Andreas Schleicher, OECD, France

»Every year we meet new customers, as a return on investment it's a really valuable place for us.«

Stuart Webster, Cengage, USE
